February 10, 2020

Greetings Parents/Guardians:

We are hosting a special event for first-time AP students on February 21st (during Study Hall in the cafeteria. Please plan to have your student attend this presentation and learn what AP has to offer and have all of your/their questions answered.

Recent data shows that all students can benefit from taking AP courses while in high school. We have been working with Equal Opportunity Schools (EOS), a non-profit organization, to increase student participation in challenging high school coursework so that they can be better prepared for college and beyond.

Advanced Placement classes are some of the most challenging classes at NCT. These classes bring college-level academic experiences into the high school. This opportunity introduces your child to college-level work before they leave high school. Colleges and universities look favorably on students who have these classes on their transcripts and often give credit for taking AP. These are the kinds of classes that help your child stand out when they start to apply for college.

Again, congratulations!! We are committed to the success of your child. Registration for fall AP classes begins in early March. Encourage your student to explore this opportunity and sign up!

Sincerely,

Toni-Ann Noyes
Principal, NCTHS

For more general information about AP before attending this event, go the [College Board](#) website.
