

PARENTS TAKE ACTION TODAY!

Without an updated
Health Services Consent
form on file for your student, school
clinic staff are **NOT** permitted to
assist your student.

- If you received a consent form from your child's school, complete and return the form to your child's school promptly.
- Or, parents may complete the consent form online through the Skyward portal.

HB 1557 requires schools to provide a list of health care services available in your child's school clinic and allows parents the option to decline consent for health services offered in the clinic.
